Product Care and Maintenance Recommendation

Trojan Developments Limited maintenance recommendations are just that (Recommendations).

It is normal for the components of any access control systems to deteriorate with time so it is imperitive that it is serviced and maintaned to ensure it is keeps fit for purpose and the exit control units are more important than most as in most cases they form part of a fire egress route.

Prox Rex
The Prox Rex unit only requires a wipe down with a damp cloth with a bit of detergent on it to remove any build up of dirt and grime on the frount and to ensure that the two LED's and sounder operating and that the door lock releases.

Press Rex
The Press Rex unit only requires a wipe down with a damp cloth with a bit of detergent on it to remove any build up of dirt and grime on the frount and to ensure that the backlit button LED's and sounder operating and that the door lock releases.

Em Rex
The Em Rex unit requires the same as above but the clear window also needs to be checked to ensure that it is clear and that the wording behind can be easely read (Press to Exit) and not scratches in any way to obstruct this. It will also need testing to ensure correct operation and reset using the correct reset tool.

Smart Em Rex
This the same as the Em Rex unit above but you also need to check that the back lighting is also operating.

Em Cover
The Em Cover just need wiping down with a damp cloth with a little bit of detergent but you will have to wipe down the inside and outside of the cover as will as the Em Rex as above.
