

EM-COVER

Un-Monitored

TROJAN
DEVELOPMENTS

This is for use with Em Rex or Smart Em Rex

Technical

The Un-Monitored Em Cover is for use with the Em Rex® or Smart Em Rex® unit to deter unintended or malicious activation of the unit when it is installed in a public area. This unit provides a physical barrier only.

Installation guide

The cover is made from polycarbonate so it is very strong and resistant to mis-use or vandalism.

The cover is held closed by two little nodules on either side of the lift up cover which lock in and inhibit the lifting of the cover. These can be filed down to make it easier to open the unit if required
